

Customized Engineering Solutions

Teradyne's Test Assistance Group (TAG) specializes in providing test solutions to meet your particular device development, production release, and tester throughput needs. Leveraging the latest test methods, development tools, and process capabilities, our universally networked expertise ensures you optimum product performance in the shortest time. TAG minimizes your development costs and delivers solutions that continue to provide maximum throughput, performance, and device revenue.

TEST PROGRAMMING SERVICES

Developed by TAG experts using leading-edge device test methods, our solutions are delivered ready to perform in your environment. Whether you need a complete test solution including interface hardware, platform conversion, or a specific software tool to increase productivity, TAG will deliver a robust and documented test solution. Additionally, we will train your staff on the operation and maintenance of the end product — minimizing future sustainment engineering costs.

- New Test Program Developments
- Test Program Platform Conversions
- EDA/STIL/Vector Conversions
- Utility Software Tool Developments

THROUGHPUT ENHANCEMENT / RUNTIME OPTIMIZATION

Reduce your test costs and increase your device test throughput and revenues. Our staff is expert at devising and implementing test time reduction, parallelism, and integrating third-party software into your test programs — and across your tester fleet.

- Runtime Optimization
- Increased Parallel Test
- Test Program Stability Analysis

Through TAG's professional project management standards and processes, you get dependable results on time. Each project's scope is defined and customized to fit your particular requirement, giving you a firm basis for planning test system utilization and engineering capacity. Rely on TAG to maximize device revenues, increase throughput, and get your devices to market faster, without adding headcount or taking non-essential risks.

CUSTOMIZED ENGINEERING SOLUTIONS ADVANTAGES

- Controlled development costs and minimum risk
- Minimum impact on internal development resources
- Dependable results
- A firm basis for resource capacity planning
